		Application No.	Applicant(s)

Application/Control Number: 09/874,327

Art Unit: 3634

This application contains claims 19-21 drawn to an invention nonelected without traverse in Paper dated 8/8/2002. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claims 1, 2, 4-6, 9, 10, 14, 16, and 22-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 1 and 10, lines 1-2, it is not readily apparent to the Examiner if the applicant is claiming an access panel or an access panel in combination with a duct having an outer surface.

Throughout the claims the applicant clearly and positively recites the duct, the opening, and the outer surface of the duct. If the applicant intends to claim the combination then the applicant should clearly and positively recite the duct having an opening and an outer surface in the preamble.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

As best understood, claims 1, 2, 4-6, 9, 10, 14, 16, and 22-25 are further rejected under 35 U.S.C. 103(a) as being unpatentable over Dugger in view of French patent No. 2719347 to Leon. Dugger discloses an access assembly comprising a duct (22), a fire

Application/Control Number: 09/874,327

Art Unit: 3634

resistant seal (74) having holes, a rectangular ("irregular shape") fire resistant cover member (10) the shape of the duct (22) a plurality of fasteners (see figure 2) including wing nuts for mounting the cover (10) to the duct. Dugger fails to disclose threaded spring clips. Leon discloses threaded spring clips. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the panel assembly of Dugger with spring clips as taught by French patent to Leon since spring clips allow for adjustability between the cover and the mounting surface.

The applicant's arguments have been considered but are not deemed persuasive. Firstly, the applicant argues that changes have been made to claims 1 and 10, which overcomes the 35 U.S.C. 2<sup>nd</sup> paragraph rejection. The applicant has failed to overcome the 35 U.S.C. 2<sup>nd</sup> paragraph rejection because the applicant has failed to positively recite the duct, the opening, and the outer surface of the duct in the preamble and yet the applicant has positively recited these elements in the body of the claim. Therefore, it is not readily apparent to the Examiner if the applicant is claiming an access panel or an access panel in combination with the duct having an opening and outer surface. Secondly, it appears that the applicant's arguments are more limiting than that of the claims. It appears that the applicant wants to claim just an access panel yet the applicant is arguing the combination of the access panel and duct having an opening and surface.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Jerry Redman at telephone number 703-308-2120.
